

Dear members and friends,

to those of you who attended the Creative thinking workshop at the TEH Meeting in Cracow and others interested Sigi from ufa-fabrik has listed some open source programmes that you can use if you want to continue experimenting with mind-mapping.

Best wishes,  
Emma.

Some people asked me after the workshop about creative thinking about mind maps on the computer.

Here is a list of programs for Main Maps for different platforms (as Windows, Mac, Linux) - and they are all free (free like free-beer!):  
for Mac, Windows and Linux (platform-independent):

1. View your Mind: <http://www.insilmaril.de/vym/>
  2. Freemind: [http://freemind.sourceforge.net/wiki/index.php/Main\\_Page](http://freemind.sourceforge.net/wiki/index.php/Main_Page)  
download: <http://freemind.sourceforge.net/wiki/index.php/Download>
- for Mac only:
1. MindNode (really easy to handle!): <http://www.mindnode.com/>
  - 2 XMind (more features): <http://www.xmind.net/>

greetings from Sigi
